

## Your dictations available anytime, anywhere

### Work smarter, not harder

Professionals who frequently work off-site meeting clients, suppliers or patients cannot always find a convenient location to record their notes, ideas or follow-up actions. Philips SpeechLive is the ultimate dictation workflow service that makes going from your voice to a written document quicker than ever before. It's a highly mobile solution ideal for working on-the-go.

### Your data is safe and always available

Through the Philips dictation recorder app and via your web browser you can access your dictation and transcription files anywhere at anytime, and SpeechLive's highest security standards keep your data safe.

Learn more about how Philips SpeechLive lets you dictate and share files in multiple location and environments by [watching a quick video](#).
